

Case Study 2  
**Anelia**

life in dignity till the end of life which means having access to care when being sick or dying and avoiding growing old lonely  
- equal access to a functioning social system for everybody

Infrastructure  
- sharing of wealth and property / help in the neighbourhood  
- better infrastructure is needed: nursing homes, nurses and their education, better working conditions  
- especially on the countryside

more money for infrastructure and people working in this area

social inclusion: social activities for older people as well as help of digitalisation

these problems cannot be solved by one country on its own, there have to be programs on European level  
- control of the distribution of money (money must not fall into the wrong hands)  
- strong countries should support weaker ones

Baden-Württemberg  
STAATSMINISTERIUM

**JLEU**

Case Study 3  
**Ivan and Dragana**

Increase political engagement of younger people (by ex. forming student parliaments, political working groups etc.), decreasing voting age, more political education programmes to tackle issues like corruption

Reform of the school system: for ex. teacher training to encourage pupils to be more socially engaged and confident

Exchange programmes between European countries, that provide more international contact and experience exchange

Strengthening education programmes, that allow you to study/work abroad and come back to work in your home country with the acquired knowledge.

More national start-up initiatives to improve the economy
