

My name is Timeea Tanțau and I am the assistant director in the project "Deșteapta Pământului"\* written by Victor Ion Popa and directed by Virgil Mureșan. Our team, the actors, the director and I, are very invested in this project and many others like it, that took form at the day center for seniors Nr 1., because we aim to bring together very different generations, but which, paradoxically, still have so much in common and want to work together. We manage to bring history back to the present and put ourselves in the shoes of those who lived many years before us and had funny stories to tell, which we can all enjoy and laugh about. I personally hope that everyone who watches our play will connect with it, even if the story itself of a girl trying to marry well isn't that appealing anymore.

\*in translation "the smartest in the world"
